Background

The nuclear industry is being presented with challenges and opportunities as the complex process of decommissioning and waste management increases in both scope and complexity.

Challenges that lie ahead need to be resolved through the application of innovative solutions and lessons learnt from past experience, through the sharing of good practice. This technical seminar will help address the complex decommissioning projects of the future.

The speakers are technical experts in their fields, providing details on decommissioning techniques and technologies; technical problems and solutions; and, most importantly, facilitate the sharing of good practice throughout the day.

This seminar provides an excellent opportunity for the nuclear clean-up community to hear about innovative techniques; share lessons and experience; improve the approach to decommissioning and waste management and accelerate current programmes.

About CIRIA

CIRIA is a member-based, not-for-profit organisation which has, over the past 13 years, published extensively on contaminated land issues.

About SAFESPUR

This CIRIA forum provides:

- a forum to discuss and better understand technical and regulatory aspects on nuclear decommissioning projects
- up-to-date information from the NDA, government and regulators
- briefings on SAFEGROUNDS and SD:SPUR learning networks
- excellent business networking opportunities with the UK nuclear and defence supply chain, industry practitioners and client organisations
- continuing professional development for you and your staff.
